

Human Genetic Engineering- A Curse!

Father Sibelius, 56

Catholic priest, very conservative- thinks that only God has the right to "create" life and thus, any form of genetic engineering is a sin.

Arguments:

1. There is a reason why Molly has this disease, but only God knows why
 - maybe it was a test and the Nashes failed.
 - God wants to be with them in their sadness, but their cheated him and he will not accept that their used technical things to create a human.
1. It is wrong that Lisa Nash said that God gave them the technology and Adam.
 - God did not gave us this technology. God gave us our life and freedom and we created the technology.
 - And God did not gave them Adam □ the researches did
1. It's abusive that they had called the engineering baby Adam
 - God's first created human being was called Adam
 - The Nashes want to play God and that is wrong. It's a sin.
1. For saving one life the Nashes killed 29 little lives / children
 - Life starts with the fertilization
 - Killing 4 years old children or this little children. You should not kill!
 - The Nashes treated the embryos like spare parts. They can't create and kill human beings like they want
1. There are other opportunities! With stem cells.
 - Perhaps 50 percent less of survival rate, but you do not kill anyone
